

LETTER OF SUPPORT

May 30, 2025

To Whom It May Concern,

As Chief Clinical Informatics Officer at the Centre for Addiction and Mental Health, I am writing to express my support for Satinder Kaur, Sherida Chambers and Stephanie Sliekers for their application titled *CAMH Digital Nursing Competency Platform: Advancing Nursing Education and Practice through Innovative Digital Solutions*. This initiative exemplifies the forward-thinking integration of digital health technologies and evidence-based nursing education, and I am confident in both the potential of this project and the project team's ability to execute this vision.

From an informatics standpoint, the platform's ability to integrate seamlessly with existing learning management systems, ensure data privacy and security, and provide adaptive, personalized learning pathways sets a new standard for digital competency development. The inclusion of peer-to-peer learning, simulation, and analytics-driven recommendations aligns with best practices in digital transformation and supports a culture of collaboration and continuous improvement.

The project leads, Satinder Kaur, Sherida Chambers and Stephanie Sliekers, bring a combination of clinical expertise, leadership skills, digital innovation acumen, education expertise, and project management insights. Their implementation plan demonstrates an understanding of both the technological and human factors essential for adoption. The team is well positioned to lead this excellent and innovative project.

Please feel free to contact me for further discussion.

Sincerely,

A handwritten signature in dark ink, appearing to read "Gillian Strudwick".
